

TRANSPORTATION

PlanRutherford includes proposed transportation improvements to help the county prepare for future growth and identifies locations in the unincorporated areas where additional capacity, enhanced shoulders, and multimodal accommodations will be necessary. The county also owns several bridges that will need to be maintained or improved over time.

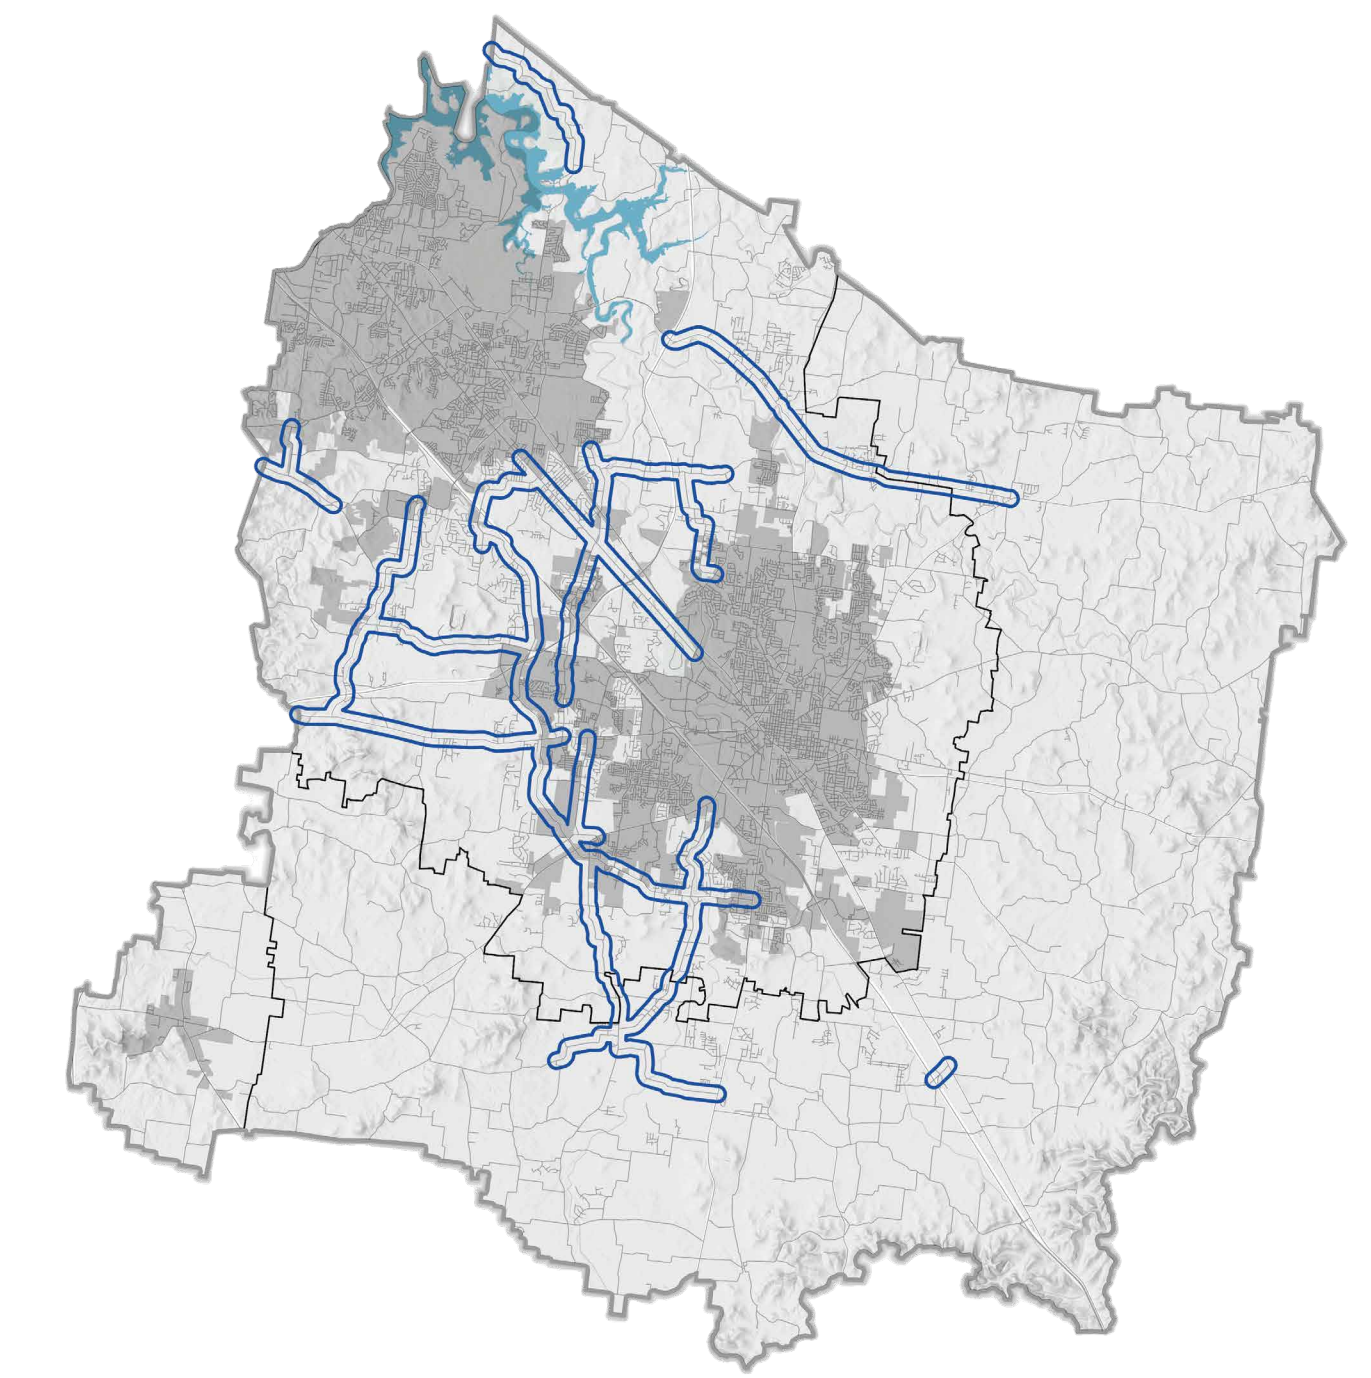

PROPOSED IMPROVEMENTS

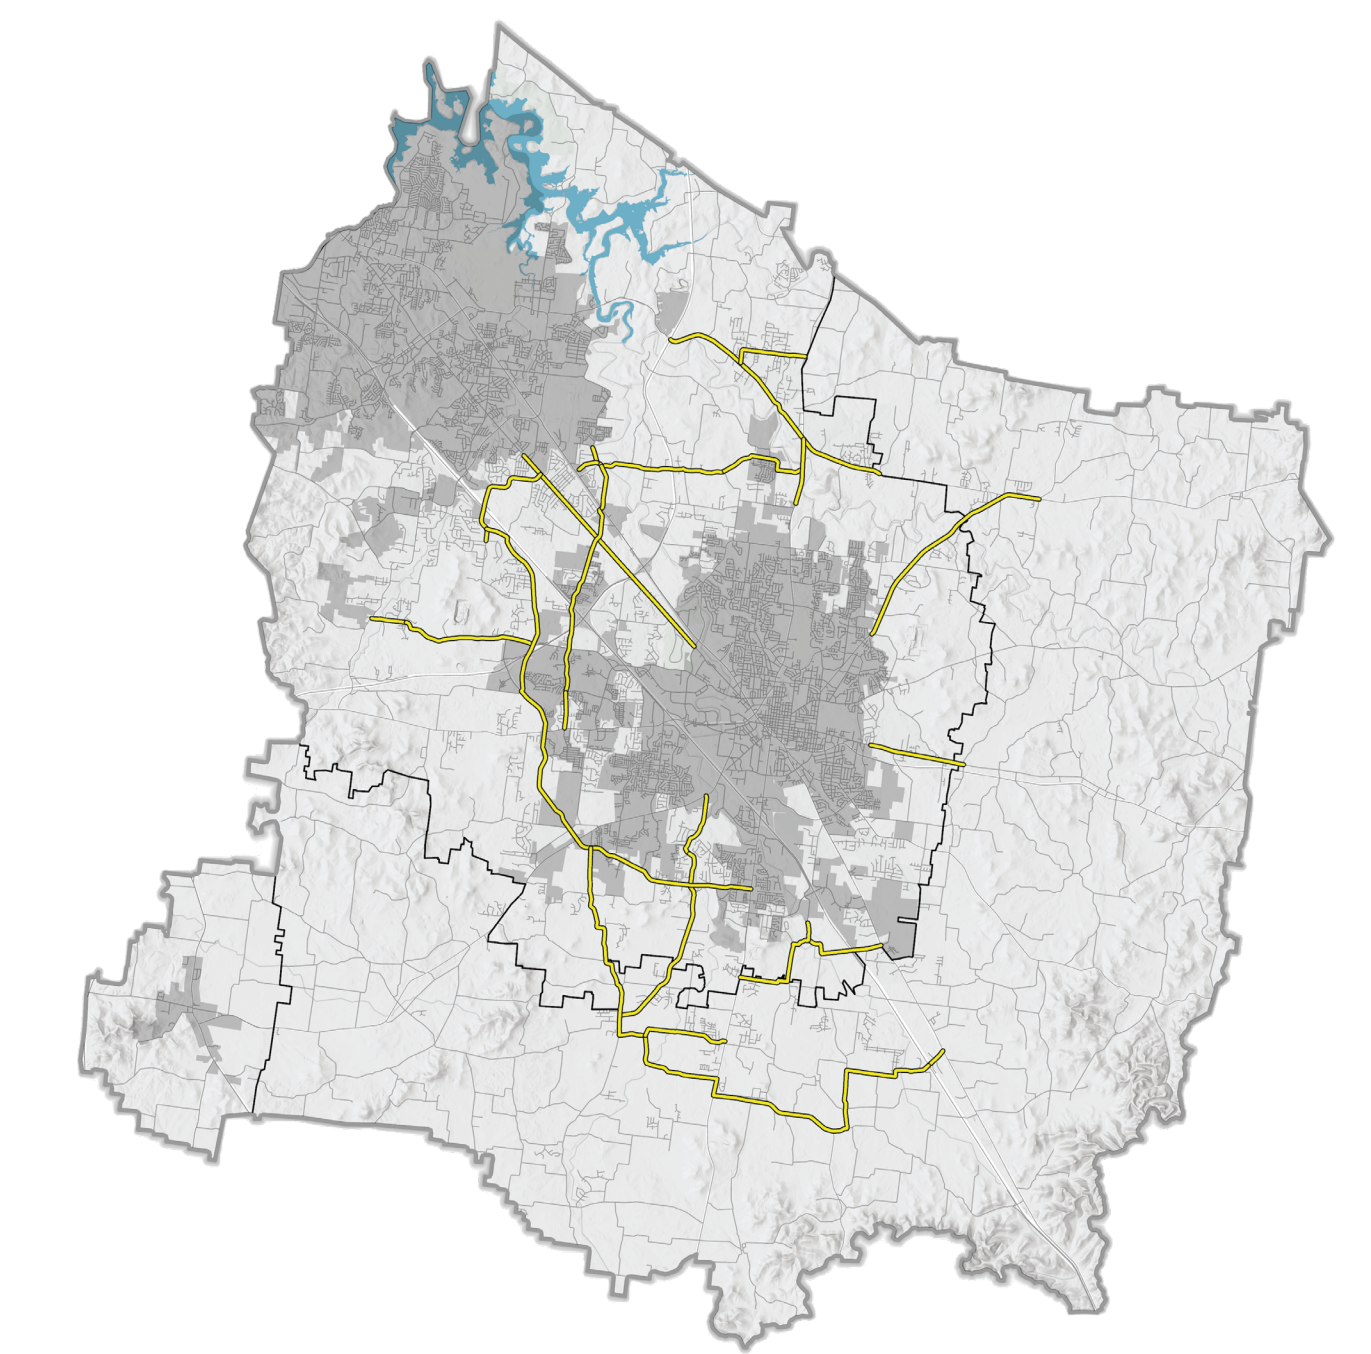

ADDED CAPACITY

Routes where an additional lane or two are needed to meet increased traffic volumes.

ENHANCED SHOULDERS

4 to 8 foot shoulders provide increased safety for motorists, pedestrians, cyclists, and first responders.

MULTIMODAL CORRIDORS

On-road improvements to provide safe accommodations for pedestrians, cyclists, and transit users (where transit service exists).
